Terminations,

Revocations and Flashes

There were forty (40) terminations during the reporting period. Sixty-three percent (63%) were successful. There were four (4) supervisees whose charges were reduced and subsequently terminated because of Prop 47.

Total # of Supervisees Successfully Terminated		Total # of Supervisees Unsuccessfully Terminated	
PRCS – 17	MS – 8	PRCS – 3	MS – 12
<ul style="list-style-type: none"> • Early Terminations: 7 • Normal Terminations: 10 			

In the reporting period, we filed a total of thirty-six (36) revocations. PRCS and MS each had a total of eighteen (18) revocations each. The breakdown by violation category is below:

Violation Type	PRCS	MS	Percent of Violations
Property	2	3	14%
Drug/Alcohol	3	5	22%
Crimes Against Persons	2	1	8%
Technical	9	8	47%
Other Crimes	2	1	8%
TOTAL	18	18	100%

Generally, the population is reoffending by committing crimes similar to those for which they are on Realignment, namely non-serious, non-violent, non-serious sex related crimes.

Forty-seven percent (47%) were for technical violations, a decrease when compared to the previous quarter (52%). Technical violations of supervision are filed when supervisees absconde or fail to abstain from substance use. Forty-four percent (44%) of the revocations filed were for new law violations involving crimes against persons, property and drug/alcohol related crimes. The remaining eight percent (8%) were for other new crimes.

There were thirty-nine (39) flashes during this reporting period.

There were a total of four (4) cases whose charges were reduced due to Prop 47 – three (3) PRCS cases and one (1) MS case. Seven (7) cases were transferred to different counties.

Service Connect HSA Dashboard

FY 15-16, Q1 (July 2015 – September 2015)

New Intakes

During the 1st quarter, new intakes at Service Connect remained fairly consistent over July (20), August (25), and September (22). Overall, the number of new intakes in the 1st quarter was slightly lower than in quarter 4 of FY 14-15. The caseload for Social Workers increased from last quarter to approximately 70 clients per Social Worker caseload, on average.

Eligibility/Benefits

Service Connect has seen a slight decrease in applications for state benefits, consistent with the slight decline in new clients, as most clients apply for benefits at intake. Service Connect enrolled 31 clients in CalFresh, 18 clients in Medi-Cal, 1 client in General Assistance, and zero clients in CalWORKs during the reporting period.

Employment Services – 550 Jobs!

Service Connect saw an 89% job placement rate (17 placements) for participants in the 550 Jobs! program during the 1st quarter. Over half of those gaining employment have been placed in community employment, earning hourly wages between \$10.40 and \$14.00. Clients have been placed in jobs in local businesses in positions such as retail, landscaping, food service, and warehouse.

Services Provided to Clients

During the 1st quarter, Service Connect has seen consistent usage of the vouchers provided in the initial Safety Net Bundle, as well as those provided to clients for stabilization throughout the case. One area of exception was observed in Single Ride Bus Tickets, which saw an increase from last quarter. Single Ride Bus tickets are typically distributed to clients who cannot demonstrate an ongoing need for a monthly pass, or who have lost their monthly pass, but still require transportation assistance. Monthly bus passes are typically provided to clients who demonstrate an ongoing transportation need to attend work, school, or health-related appointments.

Family Re-Engagement

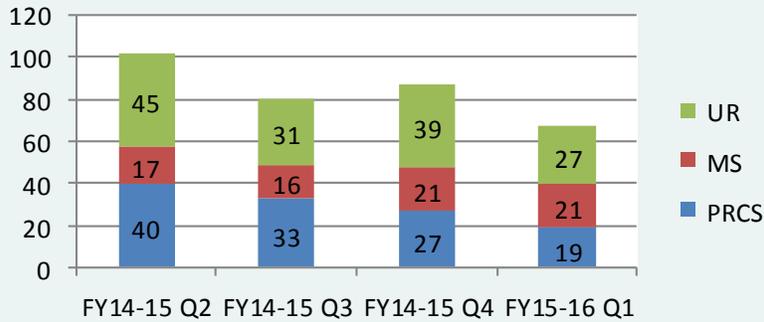

This quarter, Service Connect hosted two events to support family engagement, as well as two community outreach events. Family events are designed to afford participants opportunities for wholesome, pro-social activities with their families. Our July family event was held at the San Carlos Public Library, where clients and their families participated in dinner and story time. Many participants signed up for library cards during the event. In August, clients gathered with their families for food and music at San Mateo's Music in the Park. Also in August, Service Connect held two Community Outreach events, during which clients had an opportunity to engage in restorative justice activities. During the first event, clients spent their lunch break assembling hygiene kit bags to distribute to clients in need, and during the second event, three clients prepared speeches and gave presentations to Human Services students at Canada College, sharing their personal stories and challenges. Clients described feeling a positive impact from having the opportunity to give back to the community by sharing their experiences with those looking to enter the Human Services field.

Peer Support/Groups

Service Connect clients continue to have strong engagement with our Peer Mentors, who provide ongoing support in the community. Of the 34 individuals referred for peer mentorship during the 1st quarter, 23 (68%) have made a connection and are working with a mentor.

Service Connect BHRS Dashboard

FISCAL YEAR 2015-2016 FIRST QUARTER
SUMMARY REPORT NARRATIVE

AT-A-GLANCE: All Time Total BHRS Referred, Served, Number of Services, or Booking Encounter

The total number of participants referred to BHRS for treatment since the inception of the Service Connect is 1,219 and of those referred, 631 entered into treatment and/or recovery plans (these participants were served by BHRS and is a lower number because not all assessments result in treatment). Referred is defined as participants showing up for the first post-referral appointment and does not include those referred, but who did not follow through on the referral. This graphic also represents the total number of services (both mental health and substance use treatment) provided to participants between FY12/13 and the first quarter of FY 15/16. Service type detail is presented in the pie chart at the bottom of the dashboard. The number of services has generally grown at a rate of approximately 50% over each previous year and with the increase in participants. In FY14/15 there was a slight decrease in the total number of services per participant, possibly the result of a BHRS division-wide rapid case growth. Work was completed recently to data match participants to county jail bookings in the first quarter and although the data is not ready for the first quarter, the data match effort is promising.

Service Connect Cases with a Service

This graph represents total Service Connect participants that received at least one BHRS service. The numbers do include participants that continued from year to year, so a participant could be counted more than once in each year if their case was open across multiple fiscal years. Therefore, this graph indicates the total open cases from the previous year for reference, the total open cases for the current year, and the newly open cases for the first quarter of this fiscal year. Significant to historical growth may be in store for FY 15/16 because the number of new participants in the first quarter is nearly the annual growth rate of new participants for all four quarters of previous fiscal years.

Overall Progress and Impact on Recidivism

For those participants that have a treatment or recovery plan and exited the program in the first quarter, more than two-thirds made satisfactory progress towards completing their plan goals upon completion of the program. About 30% of the participants were unable to complete their treatment or recovery plan resulting in unsatisfactory progress (reasons include discontinued treatment, moved out of area, re-incarcerated, or deceased). No participants succumbed to recidivism and became re-incarcerated during the first quarter, based on staff and self-reporting, but this data was not matched against law enforcement data, which is currently in process for all participants that were newly opened in the first quarter.

Percent of Participants with Substance Abuse Recovery Plan or a Mental Health Treatment Plan

This graph presents what percentage of Service Connect participants had a mental health treatment plan or a substance abuse recovery plan. Recovery plans are established at a rate of two to one as compared to a mental health treatment plan. Co-Occurring participants are not represented, but will be in future reports.

Engaged Participants with Four or More Services in a Year

“Engaged” is defined as a participant that has received four or more services. This means that the participant has returned to BHRS for multiple appointments regarding different services, which demonstrates that the participant is engaged in treatment because they actively participate. In the first quarter, 52% of new participants achieved “engaged” status.

Mental Health and Alcohol & Other Drugs Services Provided by Service Connect

This pie chart reports mental health and substance abuse treatment services provided by BHRS to Service Connect participants in Q1 of FY 15/16.

Mobile Health Van Services

This graph reports data for the first quarter of FY 15/16 for the Mobile Health Van playing a critical role in service delivery to Service Connect participants. There appears to be a slight uptick in participants served by the Mobile Health Van.

Correctional Health Services

Correctional Health data presents the total participants that flow through Correctional Health for Q1 of FY15/16, the number of participants screened, the number treated medically, for mental illness, and for substance abuse.

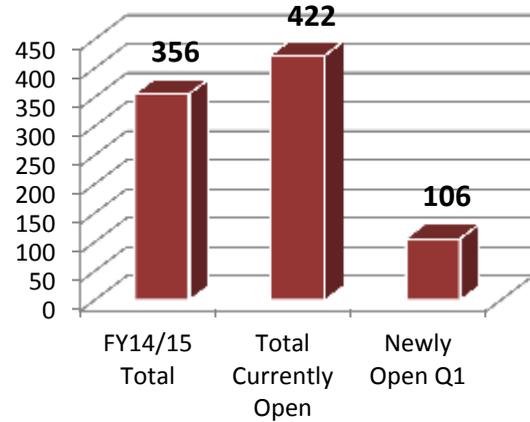

Service Connect Cases with PES Counts

A Psychiatric Emergency Services (PES) count is when a Service Connect participant has presented themselves at PES. Those participants that were not admitted are shown as a “visit” and those admitted are shown as “inpatient.” Involvement with PES is only counted if enrolled in Service Connect, counts do not include episodes when subject was not a participant in Service Connect (prior reports did count such episodes). Visits have generally remained steady over the last three fiscal years and inpatient admissions, although inconsistent, declined over the last three fiscal years.
